PROFILE

Cloud Infotech
IP Telecom Consulting, Integration & Services

WHO IS
CLOUD INFOTECH?

Cloud InfoTech Pvt. Ltd, a well-known name in the field of Telecom Hardware solutions, has made a niche for itself in providing the VOIP/ UC based Telecom solutions.

A well-placed proof of this would be the impressive growth that it has achieved in Sales and as an organization within the Industry in such a short period of time, after coming into existence in 2011. In the ever changing and ever growing telecommunications industry, today, Cloud InfoTech is one strong trustworthy name to reckon with.

Why Choose us?

Clients: Cloud InfoTech has a large set of customer base, starting from individual to large Multi-National organizations. If you are attracted in speaking to any of the clients to have a referral, then we will provide with the same.

Top Market Technology: We offer innovative top leading technology. We can provide with the best, reliable technology and modify it to your business right away.

Free Consultancy: Cloud InfoTech provides a free consultancy and demo of our product and services, permitting you to experience it earlier to making your choice. The trial demo consists of full support, understanding your problem, and guiding with the right solution.

Full Solution Centre: The Company can help you out not only with the VoIP telephony, but also with the network and connectivity infrastructure as well.

BRANDS

When it comes to validating the performance, reliability, and value of a Cloud Infotech solution, we have the stamp of approval from industry analysts.

Grandstream is a leading manufacturer of IP communication solutions, creating award-winning products that empower businesses across the globe.

GRANDSTREAM

UBIQCOM™

SMALL OFFICE SOLUTION

Cloud InfoTech offering the latest in VOIP telephony to provide the users with powerful phone solutions not only addresses small office communication needs, getting Voice over IP for Small Businesses has never been simpler. It also provides advantages in terms of telephony features and budget and is customized to business needs.

UNIFIED COMMUNICATION SOLUTION

Unified communications (UC) is the integration of enterprise communication services across multiple mediums such as fixed line phones, mobiles and PC's. Some of the features that can be extended by Unified Communication System are Voice (including IP Telephony), Presence Information, Instant Messaging, Mobility Features (including Single Number reach); Audio, Web & Video Conferencing, Desktop sharing and Data Sharing, Call Control and Speech Recognition with non-real time communication service such as Unified Messaging (integrated Voicemail, e-mail, SMS and Fax).

HOSPITALITY COMMUNICATION SOLUTION

In the hospitality space, several layers of communication can be drastically cut down to ensure better and more efficient internal as well as external communication. With an IP-based network infrastructure, hotels can deploy a flexible solution integrating data, voice, video, and convergence applications tailored to their needs. The converged network is a strategic asset for hotels to profitably improve guests' overall experience. Hotels can add services and reduce costs by integrating existing communications, security, and building automation systems over one secure, flexible, and scalable network.

AMAZING WORLD
LEADING CUSTOMERS

ENTERPRISES SOLUTION

Communication is the heartbeat of any enterprise, startup, or business. Whether the size or scale of your needs, no organizations can run effectively without an efficient external or internal communication system. The business phone system doesn't just present a unified communication system, but even act as communication tools to help your organization streamline and organize operations onward to success. With so many latest technologies in VoIP plans, it gets confusing with clients from all the industries.

GOVERNMENT SECTOR SOLUTION

Meet the challenges of the modern workforce with secure and reliable Communication solutions that can even deal with mass volume even in natural disasters.
You need scalable, flexible, mobile integrated communications to make sure that you have a competitive edge.

SURVEILLANCE SOLUTION

IP Surveillance has become a must for Enterprises and Business of any level
to prevent losses, to cover risk management & other operations and improve
overall security systems across all sectors like IT, Retail, Hospitality, Health Sector, Government Sector, Educational Institutions, Real Estate, Small Businesses and many more..

FIND RIGHT SOLUTION FOR YOUR BUSINESS

We Believe In
Customer Satisfaction

To provide value-driven VoIP security services and solutions to our customers by striking the right balance of price and performance, thereby helping them in maintaining higher returns on investment. Effective communication is one of the most important aspects of a successful business.

There are many communication channels available for the present-day companies for getting in touch with various key-people in their industry as well as their current and prospective clients and customers.

The Right Choice For You

Business IP Phone
We are introducing a professional range of **IP phones** that can make a revolutionary effect on your business. As we all know how **IP phones** create a tremendous effect on the quality of video or voice calls, data connectivity, etc. this ultimate set of **IP phones** can provide you with even more benefits to your business. The features, the advantages, the extra effects on your communication system, will definitely make an advanced effect on the growth of your business.
.

VOIP ANALOG GATEWAYS
VoIP analog gateways are a set of small appliances that help in smooth connecting of your legacy telephony infrastructure to analog phone lines with the help of IP networks. Because of its smooth running of the communication process, it is adopted by most of the business organizations. Moreover, those businesses that are already having VoIP at the core with the IP PBX system, are adopting **VoIP analog gateway**s to get more seamless connectivity for emergency fallback.

PRI GATEWAY
The investment in PRI (Primary Rate Interfaces) will not only be a smart decision because of its role as a source of effective business returns. Along with offering the best quality **PRI gateway** at cheaper costs, we also differentiate your business in this competitive world. The best features that carry the attention of every business persons are explained as under.

IP PBX
IP PBX or private branch exchange (telephone switching system within an enterprise) is a system that provides telephone calls over IP networks. It switches calls between VoIP users on local lines and allows its users to share a certain number of external phone lines. It can also switch calls between a VoIP user and a traditional telephone or landline user, or between two traditional telephone users just like a conventional PBX does. It can come in various abbreviative texts, such as IP-PBX, IP/PBX, or IPPBX.

SESSION BORDER CONTROLLER
Session Border Controller is basically a network function which make sure that your communication is secured over VoIP infrastructures. At the same time, a SBC offers brilliant interworking between varied signalling messages as well as media sessions coming in from the end or application servers. You can find SBCs deployed across different size Enterprise infrastructures, commercial setups, and even residential properties possessing VoIP services.

Video Conferencing

Video conferencing is an application of technology which allows people to connect with many different people from actually being at their own place. These days every company or businesses whether small or big are using **video conferencing system** to expand their business and productivity. Also, **video conferencing solutions** also being used for **educational** purposes as
